

These color boards have been created as a resource to use when designing a new or renovated Home2 Suites property. For modified or custom design packages, simply replace the images with your own selections.

This is a tool to help define the scope and portray the overall schematic design concept. These boards do not replace the need for specifications that are required for interior design review.

Dynamic

Inspired by the built, urban environment, Dynamic displays a bold and elevated eclecticism throughout the public space and guestrooms. Saturated blocks of color and streamlined graphic shapes contrast to evoke the feeling of bustling energy; a place for guests to be invigorated and inspired.
